

KLIPP ®

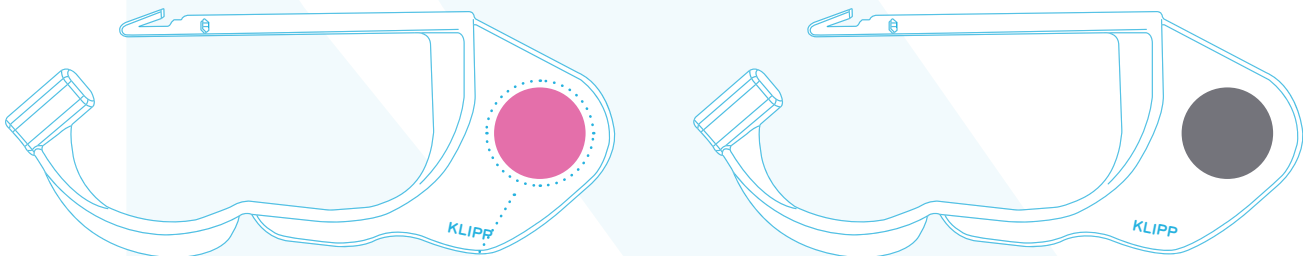

With transit label

Description

Two-part system

A fixed part and a movable locking part. The fixed part consists of a gripping tongue (for handling/manoeuvring) and a rod with a harpoon at its end (engagement element).

The movable part has a cooperating socket designed to receive the harpoon. The socket acts as a locking element when the harpoon is inserted into it.

Witness label

A pink indicator label is affixed to the tab, which turns grey after exposure to steam.

This label indicates that the seal has been exposed to a steam
